	3-yr	5-yr
New Century Capital	11.49	11.07
Large Blend	10.62	9.96
S&P 500	10.24	9.46

\*A Morningstar category for domestic equity funds that invest in a mixture of large U.S. stocks in the top 70% of the capitalization of the U.S. equity market. Morningstar assigns this category to funds where neither growth nor value characteristics predominate.

\*\*A widely followed benchmark of large firms' stock performance which includes 400 industrial firms, 40 financial stocks, 40 utilities and 20 transportation stocks.

\*\*\*This statistic reflects the degree to which returns fluctuate around their average over a period of time. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.

†The Morningstar Tax Cost Ratio measures how much a fund's annualized return is reduced by the taxes investors pay on distributions. Mutual funds regularly distribute dividends and capital gains to their shareholders. Investors then must pay taxes on those distributions during the year they were received. The % Rank in Category is the fund's tax-adjusted total-return percentile rank for the specified time period relative to all funds that have the same Morningstar category. The most favorable rank is 1 and the least favorable is 100. Figures shown reflect the three-year period ended 6/30/08.

### Fund Description

New Century Capital is dedicated to a philosophy ... diversification can reduce risk without sacrificing performance. The Portfolio's objective is to provide capital growth and, as a secondary objective, to earn income. New Century maintains rigorous investment qualifications for the mutual funds in which it invests: strong performance, reasonable risk-adjusted returns and consistent management styles. Diversification does not assure or guarantee better performance and cannot eliminate the risk of investment loss.

### Fund Highlights

- **Diversification** through a blend of value and growth investments allocated among large-cap, mid-cap, small-cap and international positions
- **Access to no-load mutual funds, institutional funds and ETFs**
- **Disciplined category ranges reduce risk**
- **Investments are not limited to a single fund family or institution**
- **Active management** consistently monitors fund objectives and performance
- **Simplified year-end tax reporting** on a single tax statement

\*The Acquired Fund Expense Ratio reflects the fees and expenses incurred by the New Century Capital Portfolio for the fiscal year ended 10/31/07 as a result of its investment in other registered investment companies. These expenses are not incurred directly by shareholders.

\*\*The Total Expense Ratio includes New Century Capital Portfolio's Direct Expense Ratio of 1.25% and the Acquired Fund Expense Ratio of 0.81% for the period ended 10/31/07.

\*\*\*A 2.00% redemption fee is imposed on any shares redeemed within 30 days of their initial purchase. The redemption fee does not apply to shares purchased with the reinvestment of dividends, capital gains or exchanges.

Morningstar Ratings reflect risk-adjusted performance and are derived from a weighted average of the fund's 3-, 5- and 10-year (if applicable) Ratings. For the periods ended June 30, 2008 the fund received 4-Stars Overall among 1715 funds, 4-Stars for the 3- and 5-year periods among 1715 and 1325 funds respectively, and 3 stars for the 10-year period among 660 funds in the Morningstar Large Blend category.

The Morningstar Ratings formula measures the amount of variation in a fund's performance and gives more emphasis to downward variations. Ratings are subject to change every month. The top 10% of the funds in the category receive 5 stars; the next 22.5% 4 stars; the next 35% 3 stars; the next 22.5% 2 stars; and the last 10% 1 star.

### Standard Deviation for the periods ended 6/30/08\*\*\*

	3-yr	5-yr
New Century International	15.51	14.11
MSCI EAFE	12.28	11.48
Foreign Large Blend	13.07	12.02

\*The MSCI EAFE Index is a widely recognized benchmark of the world's stock markets that typically includes 80% of index securities and select derivative instruments in Europe, Australasia and the Far East.

\*\*A Morningstar category for funds that seek capital appreciation by investing at least 80% of assets in a variety of large international stocks with market capitalizations greater than \$5 billion. Morningstar assigns this category to funds where neither growth nor value characteristics predominate.

\*\*\*This statistic reflects the degree to which returns fluctuate around their average over a period of time. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.

<sup>†</sup>The Morningstar Tax Cost Ratio measures how much a fund's annualized return is reduced by the taxes investors pay on distributions. Mutual funds regularly distribute dividends and capital gains to their shareholders.

Investors then must pay taxes on those distributions during the year they were received. The % Rank in Category is the fund's tax-adjusted total-return percentile rank for the specified time period relative to all funds that have the same Morningstar category. The most favorable rank is 1 and the least favorable is 100. Figures shown reflect the three-year period ended 6/30/08.

## Fund Description

New Century International is dedicated to a philosophy ... diversification can reduce risk without sacrificing performance. The Portfolio's objective is to provide capital growth and, as a secondary objective, to earn income. New Century maintains rigorous investment qualifications for the mutual funds in which it invests: strong performance, reasonable risk-adjusted returns and consistent management styles. International investments may involve additional risks, such as currency rate fluctuation, different financial and accounting standards, and political instability that may cause greater volatility and expose the Portfolio to other risks generally not associated with domestic investments. Diversification does not assure or guarantee better performance and cannot eliminate the risk of investment loss.

## Fund Highlights

- **Diversification** through a blend of large-cap, mid-cap and small-cap positions allocated geographically among mature and emerging markets
- **Access to ETFs** enables the Fund to invest in a specific country
- **Investments are not limited to a single fund family or institution**
- **Active management** consistently monitors fund objectives and performance
- **Simplified year-end tax reporting** on a single tax statement

\*The Acquired Fund Expense Ratio reflects the fees and expenses incurred by the New Century International Portfolio for the fiscal year ended 10/31/07 as a result of its investment in other registered investment companies. These expenses are not incurred directly by shareholders.

\*\*The Total Expense Ratio includes New Century International Portfolio's Direct Expense Ratio of 1.35% and the Acquired Fund Expense Ratio of 0.86% for the period ended 10/31/07.

\*\*\*A 2.00% redemption fee is imposed on any shares redeemed within 30 days of their initial purchase. The redemption fee does not apply to shares purchased with the reinvestment of dividends, capital gains or exchanges.

Morningstar Ratings reflect risk-adjusted performance and are derived from a weighted average of the fund's 3-, 5- and 10-year (if applicable) Ratings. For the periods ended June 30, 2008 the fund received 4-Stars Overall among 558 funds, 4-Stars for the 3-year period among 558 funds and 4-Stars for the 5-year period among 449 funds in the Morningstar Foreign Large Blend category.

The Morningstar Ratings formula measures the amount of variation in a fund's performance and gives more emphasis to downward variations. Ratings are subject to change every month. The top 10% of the funds in the category receive 5 stars; the next 22.5% 4 stars; the next 35% 3 stars; the next 22.5% 2 stars; and the last 10% 1 star.

<sup>1</sup>A Morningstar category for funds that typically invest 50%-70% of assets in equities and the remainder in fixed income and cash.

<sup>2</sup>A widely followed benchmark of large firms' stock performance which includes 400 industrial firms, 40 financial stocks, 40 utilities and 20 transportation stocks.

<sup>3</sup>The Lehman Brothers Intermediate Government/Credit Index is an unmanaged index of intermediate and long-term government securities and investment grade corporate debt securities.

<sup>4</sup>Hedge Fund Research, Inc. Fund of Fund Diversified Index is an equally weighted performance index of hedge fund of funds which invest in a variety of strategies among multiple managers. The three month performance is an estimate only and is subject to change. All performance prior to that is locked and no longer subject to change.

<sup>5</sup>This statistic reflects the degree to which returns fluctuate around their average over a period of time. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.

### Fund Description

New Century Alternative Strategies is dedicated to a philosophy ... diversification can reduce risk without sacrificing performance. The Portfolio's objective is to provide long term capital appreciation and, as a secondary objective, to earn income, while managing risk. New Century maintains rigorous investment qualifications for the mutual funds in which it invests: strong performance, reasonable risk-adjusted returns and consistent management styles. Diversification does not assure or guarantee better performance and cannot eliminate the risk of investment loss.

### Active Management/Diversification

The Fund allocates its investments among ten separate investment categories including convertible bond arbitrage, merger arbitrage, long/short equity, natural resources and asset allocation. Investments in arbitrage strategies, distressed securities, options, foreign securities, and long/short selling will expose the Fund to additional risks and volatility. Short selling involves the risk of potentially unlimited increase in the market value of the security sold short, which could result in potentially unlimited loss for the funds employing this strategy. Investments in foreign securities may involve additional risks, such as currency rate fluctuation, different financial and accounting standards, and political instability that may cause greater volatility and expose the Portfolio to other risks generally not associated with domestic investments. Funds are generally selected which have strong risk adjusted returns and low correlation to the U.S. equity market. The percentage allocated to each category varies within ranges, based on each strategy's relative performance, volatility and correlation to other categories within the portfolio.

### Portfolio Management

Ronald A. Sugamei, Portfolio Manager and Vice President of New Century Portfolios, has been with the Advisor since 1984. He has managed the Portfolio since inception.
